

1. Just use the logo not the white 9-1-1 REALITY SIMULATOR. Make the logo appropriate size centered.
2. Increase the size of the logo and change to the White one submitted in the zip.
3. Remove No Scenario Loaded and awaiting Instructor
4. the map image should be better seen it's too vague cannot see it at all.

The way we tested this is right click on this and SET AS DESKTOP. This is how the team is testing and this image is not acceptable. Try it yourself. The font isn't clear.

The image should be centered higher and we need a much higher resolution.

Side by side has the Active screen on both screens. You have to test it. Go to the side by side and right click and say SET AS DESKTOP BACKGROUND. There you will see it doesn't do what it's supposed to do. And ProComm has three monitors. You will have to setup multiple monitors to test this.

Your font and menu does not match.

Remove the logo at the top.

Where INSTRUCTOR 2 is that will be an area that automatically loads the actual computer NAME.

The font on lettering should be **Roboto Condensed**.

The menu is incomplete see this and add Training Resources.

Change all icons to match and have color attached zip.

ENTER MODEL we will need to enter that information.

Not transparent, just white and it's an exact copy of the fixed dark model.

Where is the secondary page for the dashboard. This is the Dashboard and is part of the work. Remember font is Robo condensed. Instructor 2 area again is the name.
